DETAILED ACTION

Claim Objections

Claim 2 is objected to because of the following informalities: In line 19, the claim language" and about to a point about" in not grammatically correct, and appears to be some sort of typographical error. Appropriate correction is required. Also, in line 21, it appears that an "a" is missing between "bore forming" and "core inner step".

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The term "about" in line 19 of claim 1 renders the claim indefinite, as it is does not sufficiently define the scope of the claimed invention. It appears that applicant is intending to claim a range of measurements without making clear the bounds of the range. The term "about" also appears in claim 6, and renders that claim indefinite for the same reasons. It is not clear whether a grenade having a length of 9.4 inches, or 9 inches, or 8 inches would read on the claim language.

Allowable Subject Matter

Application/Control Number: 10/657,563

Art Unit: 3712

Claims 1-9 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter: The prior art fails to disclose or suggest a device having all of the limitations of claim 1. In particular, there is no suggestion of a central axial bore in the nose cone having all of the features as described in claim 1. Ambrosi is the closest prior art, in that it discloses a training grenade comprising a cylindrical body, a finned tail, and a nose cone similar in structure to that of claim 1. However, there is no disclosure of a rear axial bore and a central axial bore of differing diameters as recited in lines 13-21 of claim 1. Other prior art also fails to disclose or suggest this feature. As a result, claim 1, and all claims dependent therefrom, contain allowable subject matter.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ambrosi, Batou, Matzagg, Dravecky, Hsiung, Hjellnes and Brandt disclose various practice grenades.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kurt Fernstrom whose telephone number is (703) 305-0303. The examiner can normally be reached on M-F 9:30-6:00.
